# An Innovative Provider of Global Procurement, Logistics and Supply Chain Management

Our world-leading managed supply chain services are capable of handling your requirements, ensuring that your inventory is delivered on-time directly to your manufacturing facilities. On a daily basis, we are responsible for the sourcing and distribution of thousands of parts to hundreds of customers that from small independent traders through to large global corporations.

In addition to our supply services, we can also provide your production lines with access to locally stored buffer stock that is available at a fixed annual price, giving you the opportunity to take advantage of favourable market conditions at a moment's notice.

Formed in 2002 and as part of the highly respected Cyclops Group, we have a foothold in the European, North American and the Far East markets, offering our customers a truly global presence when it comes to the sourcing and delivery of their electronic inventories.

- ✓ Global procurement expertise, to deliver the best quality parts, on time and at a competitive price.
- ✓ Reduced inventory and stock availability on a pay on consume basis, increases cash flow
- ✓ Locally available inventory with fixed annual pricing
- ✓ Cost effective vendor and inventory reduction programmes
- ✓ A transparent approach to the procurement and movement of all your stock
- ✓ Access to GSS' value added services, such as electronic manufacturing and excess inventory management
